

for Occupational Health

socrates
patient management systems

Socrates Occupational Health (OH) completely automates your manual Occupational Health requirements while building on the market success of the underlying Socrates Patient Management Systems technology.

Key Benefits include :

- Build your own tailored assessments for each company or even department
- Single front end for input of consultations
- Build company specific reporting templates
- Integrates directly into Socrates allowing direct access to your existing patients, companies and Socrates clinical data
- Full accounting control for invoicing, statements and receipts

Product Features

- Build and report on your own tailored or company assessments.
- Assessments can be linked to existing Socrates consultation templates such as investigations, immunisation schedules or letter templates.
- Huge efficiency improvements for an OH Doctor/OH Nurse by having the patient's specific OH consultation requirements on screen and all available to input and report on from one location.
- Patients can be linked directly to a company and company specific details on their job role, employee number can be entered and updated also.
- Single front end for creation, input and reporting of an OH consultation.
- Integrates directly into existing companies and company accounting rules.
- SMS patient appointment reminders.
- Socrates Instant Messenger for internal messaging between work colleagues.
- Company specific reporting exists for OH visits, case tracking, fit for work templates, detailed visit breakdowns etc.
- Ability to easily print or email any OH consultation item exists from the OH navigation bar.
- Direct links to patient's registration details and document management system exist for quick and easy navigation to update demographics and view external scans.
